## Harbor Regional Center Approved Concepts

<sup>1</sup>Concepts that include ongoing staffing needs should pursue other resources to continue funding staffing costs that extend beyond the approved funding amount. Contracts that include staff or consultants should include how the benefits of additional positions, staff or consultants, will be sustained ongoing. Contracts that include staff or consultants hired for developing employment opportunities, community integration, and/or person-centered practices must include measurable goals for progress and address how that progress will be sustained ongoing, with or without the continuation of funding for staff or consultants.

<sup>2</sup>Instead of large passenger vehicles, providers must consider purchasing smaller vehicles to allow for more individualized community access. Contract milestones must demonstrate measurable increased community involvement and goals for how that will be sustained.

<sup>3</sup>Funds awarded for training purposes are intended to support sustainability of the training benefits over time. As appropriate, additional funds may have been added to this concept to support this intention. Regional centers should work with the provider on a plan for sustaining the benefits of the training, considering anticipated changes such as staff attrition. Progress reports must show how the delivery of services has changed since receiving training, what policies and procedures have been updated to account for sustaining stronger person-centered practices, and how that change is measured.
