

Supporting our Community

- ❖ Understanding barriers and challenges for our families
- ❖ Helping families use available services and supports
- ❖ Reach out to diverse communities
- ❖ Partnering with family support groups
- ❖ Training on topics families want
- ❖ Information: Booklets, fact sheets, videos
- ❖ Working with community organizations to provide more training and information

We will continue to:

- ❖ Share information with parents, answer questions, and seek input on what would make services easier to access
- ❖ Organize and co-host training on topics such as developmental challenges, bullying, working as a team with the schools, and more
- ❖ Provide publications and videos on: available services, service coordination, respite, employment, transition, adult services, living options
- ❖ Offer parent to parent support to help families be aware of and use available services, especially for families with unique challenges
